Skills

- VueJS | Nuxt | Angular | Flutter | React | Typescript | Tailwind | Bootstrap | SASS | Figma | CSS | JavaScript | Pinia | Socket
- Python | Azure | CI/CD | Jira | C# | Firebase | Vitest | Jest | SQL | Cypress | NodeJS | Unit Testing | Storybook | UI/UX
- Microservices | Git | Frontend | Backend | Full-Stack | Portuguese | English

Experience

Frontend developer	**Neogrid**	**01/2024 - Actual**

- Led the front-end implementation using **Vue.js, Typescript** and **Nuxt**, which helped increase the team's productivity and reduce significantly reduce the development time for new features.   .
- Implemented agile practices and configured a continuous integration/continuous delivery **(CI/CD)** flow with **Azure DevOps**, which accelerated the development cycle and allowed changes and corrections to be applied more quickly and efficiently.
- Led the migration of an application developed in **React** to **Nuxt 3,** modernizing the base code and integrating improvements performance, accessibility and **SEO**.
- I joined a team to develop a mobile application in **Flutter**, working on the integration between frontend and backend in **Python** and **Firebase** database configuration, ensuring high performance and reliability.
- Inserted unit tests with **Vitest** and **Cypress**, which reduced maintenance costs and increased the quality of deliveries, strengthening the stakeholder confidence in the product.
- Using **Storybook**, I documented and organized the application's **design system**, which facilitated component development.

Frontend developer	**Predify**	**06/2022 - 01/2024**

- I worked on creating interfaces with **Vue.js**, integrating them with **APIs** and using **design systems** in **Figma**. The focus was always on improved user experience, which resulted in better visual consistency and significant reduction in rework.
- I played an essential role in migrating the legacy project from **Angular.JS** to **Vue.js**, developing interfaces integrated with APIs. improved user satisfaction and increased customer retention.
- Daily, I participated in **code reviews** that helped reduce bugs and prevent failures in production. This ensured that the software was more reliable and delivered constant value to users.
- I actively contributed to the development and evolution of the company's **design system**, ensuring visual and functional consistency across all applications.

Freelancer developer	**Freelancer**	**03/2021 - 06/2022**

- Development of responsive and optimized interfaces using **HTML**, **CSS** and **JavaScript**
- Implementation of dynamic and interactive functionalities with **Vue.js**.
- Creation of custom scripts and task automation with **Python** and **Node.js.**

Education

Systems analysis and development	**Universidade Cruzeiro do sul**	**01/2024 - 01/2026**

Languages

- Portuguese**: Fluent/Native**
- English**: Fluent**
